## EDUCATION

### CHRIST (Deemed to be University)

Master of Computer Applications (MCA)

Bengaluru, India

June 2025 – Present

### Sri Ramakrishna College of Arts & Science

Bachelor of Science, Computer Science with Data Analytics | CGPA: 7.95 / 10

Coimbatore, India

August 2022 – May 2025

## EXPERIENCE

### AI/ML Engineer Intern

Mar 2026 – Jun 2026

Job Jockey | Internship

Remote

- Developed and integrated ML and LLM-powered features including resume parsing, job-description matching, and intelligent automation workflows for recruitment platforms.
- Built and deployed JobJockey ([jobjockey.in](https://jobjockey.in)), a full-stack AI hiring platform with an LLM-powered Hiring Assistant for candidate shortlisting and a real-time Voice AI Agent enabling context-aware conversations.
- Engineered full-cycle ML pipelines covering data preprocessing, model evaluation, API integration, and deployment of scalable AI solutions.
- Collaborated with cross-functional teams to build, optimize, and deploy production-ready applications using Next.js, FastAPI, PostgreSQL, Supabase, and cloud platforms, ensuring performance, scalability, and reliability.

## PROJECTS

### Crime Data Analysis & Perpetrator Identity Prediction | Python, Scikit-learn

[GitHub](#)

- Designed an ML pipeline to analyze historical crime data and predict perpetrator identity using classification algorithms and feature selection.
- Improved prediction reliability through model evaluation and transformed raw data into actionable insights for law enforcement.

### Reddit Streamlit Dashboard: ETL | Python, Streamlit, Reddit API

[GitHub](#)

- Built a real-time Reddit analytics dashboard performing ETL pipelines, sentiment tracking, and interactive trend visualization.
- Integrated Reddit API to extract live post data, applied NLP-based sentiment analysis, and displayed insights via Streamlit.

### Fraud Detection System using Machine Learning | Python, Scikit-learn, Flask

[GitHub](#)

- Developed and deployed an ML-based fraud detection system using classification algorithms and feature engineering to identify suspicious transactions.
- Improved detection performance by handling class imbalance and optimizing models using precision, recall, and F1-score metrics.

## TECHNICAL SKILLS

**Languages:** Python, SQL, Java, C, JavaScript

**Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

**Frontend:** HTML, CSS, React, Next.js, Streamlit

**Backend:** Node.js, Flask, FastAPI, REST APIs

**Databases:** MySQL, PostgreSQL, Database Design & Integration

**Data & Analytics:** Data Preprocessing, Data Wrangling, Descriptive Analytics, Predictive Analytics, Sentiment Analysis, ETL Pipelines, Data Modeling

**AI & ML:** Prompt Engineering, Voice AI Pipelines, LLM Orchestration, NLP, Model Evaluation

**Tools & Deployment:** Advanced Excel, Power BI, Git & GitHub, Docker, Cloud Deployment

## ACHIEVEMENTS & ACTIVITIES

### Core Committee Member

June 2025 – Present

Labyrinth Club, Christ University, Bengaluru

- Contributing to tech events, workshops, and community initiatives for the department.
- Assisting in planning and executing events that enhance student engagement and learning.
